Professional Summary

Final-year Instrumentation Engineering student at Sekolah Tinggi Meteorologi Klimatologi dan Geofisika (STMKG) with a GPA of 3.61. Passionate about Artificial Intelligence, Machine Learning, Climate Technology, IoT, and Software Engineering. Experienced in developing Bidirectional LSTM models for rainfall prediction, building web-based monitoring systems, and delivering science and aptitude training to more than 500 students since 2024.

Education

Sekolah Tinggi Meteorologi Klimatologi dan Geofisika (STMKG)
Instrumentation Engineering
2022 - Expected Graduation 2026
GPA: 3.61

Research

Undergraduate Thesis
Rainfall Monitoring and Prediction System using Bidirectional Long Short-Term Memory (Bi-LSTM)
Based on Climate Data in West Java.
Supervisor: Anton Widodo

Teaching Experience

Academic Tutor (2024 - Present)
Institutions: Science Society, Kejar Kedinasan, Bintang Taruna, Krida Nusantara, Atmos Education, and Private Tutoring.
Subjects: SKD (TWK, TIU, TKP), UTBK (PK, PU, PM), High School & Junior High School Mathematics, Physics, and Numerical Reasoning for Police Academy Preparation.
Impact: Guided 500+ students through regular classes and private mentoring.

Selected Projects

- Rainfall Monitoring & Prediction System using Bi-LSTM, TensorFlow, Flask, MySQL, HTML, CSS, JavaScript.
- IoT Weather Monitoring Platform using ESP32.
- Interactive Climate Data Dashboard for rainfall analysis.

Technical Skills

Languages: Python, SQL, HTML, CSS, JavaScript
Machine Learning: TensorFlow, Keras, Scikit-learn, Pandas, NumPy
Backend: Flask

Visualization: Matplotlib, Plotly
Database: MySQL
Embedded: Arduino, ESP32
Tools: Git, Linux, Jupyter Notebook

Certifications

- Cisco Networking Academy – CCNAv7: Introduction to Networks (2024)
- Cisco Networking Academy – CCNA: Switching, Routing, and Wireless Essentials (2025)

Areas of Interest

Artificial Intelligence • Machine Learning • Deep Learning • Climate Technology • Time Series Forecasting • IoT • Data Engineering • Backend Development
